

10 - 12 September 2024: HOS Leadership Delegation @ IHF World Hospital Congress Rio de Janeiro 2024

Prof Aymeric Lim, CEO, NUH speaking at the plenary on Revolutionizing healthcare: The current landscape of generative AI.

In September 2024, the HOS Leadership Delegation took part in a business trip to Rio de Janeiro to attend best practice visits and the 47th IHF WHC organised by IHF.

At the plenary on Revolutionizing healthcare: The current landscape of generative AI, Prof Aymeric Lim, Chief Executive Officer, National University Hospital showcased how AI is streamlining hospital operations. He shared how Singapore's healthcare system excels in balancing high life expectancy with low costs, and AI is helping them further enhance care.

The HOS Leadership Delegation at IHF WHC 2024 in Rio de Janeiro.

The National University Health System is an example of how AI-driven innovation can revolutionize healthcare delivery to meet rising demands, setting a global benchmark for efficiency and quality in patient care ([IHF News & Insights Article](#)).
